

TARZANEGROUP

MICRO, MINIATURE AND SMALL ORCHIDS

DENDROBIUM CUSPIDATUM

Origin: Thailand & Myanmar

Temperatures: Hot to warm growing small size orchid species

Light: Bright shade / bright indirect light

Watering & fertilizing: Regular watering and fertilizing in active growing season (spring summer), semi-deciduous – no fertilizing in the winter time, low watering during winter.

General care: Great and easy to grow small size Dendrobium species with beautiful off-white blooms that are quite nice size. Grows best under warm to hot conditions, in bright shade / bright indirect light, good air movement and good humidity. These are semi-deciduous, they can lose all or majority of leaves for the winter season, do not fertilize over the winter and lower watering till new growths start in the spring. Can be grown potted or mounted. Great plant for indoor growing on windowsills or greenhouses and outdoors in proper zones like Florida.
