MICRO, MINIATURE AND SMALL ORCHIDS

## DENDROBIUM RHOMBEUM

**Origin:** Philippines

**Temperatures:** Warm to cold growing small/medium size orchid species

**Watering & fertilizing:** Regular watering and fertilizing in active growth, goes dormant, no fertilizer from October, no watering after leaves drop off or from mid-December till new growths appear in spring.

**General care:** Similar to nobile type Dendrobiums, this Philippine species goes completely dormant for the winter time and buds appear early spring before new sprouts start. Grows best under cold to warm conditions, in bright shade. Good watering and fertilizing during spring and summer, stop fertilizing in fall and stop watering once leafless till new growths appear. Can be grown potted or mounted. Great plant for indoor growing on windowsills or greenhouses and outdoors in proper zones.
