MICRO, MINIATURE AND SMALL ORCHIDS

## DENDROBIUM ABERRANS

**Origin:** Papua New Guinea

**Temperatures:** Hot to cool growing small size orchid species

**Light:** Bright light

**Watering & Fertilizing:** Regular watering and fertilizing year-round, slightly letting dry out between waterings.

**General care:** One of the cute and very easy to grow Dendrobiums from PNG that is actually hot growing. Grows well either potted or mounted, bright indirect light in the summer, brighter in the winter, hot to cool temperatures. Regular watering and fertilizing year – round, this Dendrobium blooms on old leafless canes and canes with leaves between fall to spring with fragrant whitish blooms. Great for outdoor / indoor growing, windowsills or greenhouses. Can be grown in Florida outside year-round.
