MICRO, MINIATURE AND SMALL ORCHIDS

DENDROBIUM LEUCOCYANUM x PROTRACTUM

Origin: Cross

Temperatures: Cool to intermediate growing miniature size orchid cross

Light: Bright light

Watering & Fertilizing: Regular watering and fertilizing year-round, good quality water only.

General care: This is brand new cross from Europe, and thanks to Dendrobium leucocyanum as one of the parents, it is very compact small grower with stunningly violet colored blooms! Grows the same like PNG miniature Dendrobiums, this one is warm tolerant. Can be grown potted or mounted, cool to intermediate, bright light, good quality water and high humidity. Great plant for windowsills, greenhouses, or outside growing year-round.
