

TARZANEGROUP

MICRO, MINIATURE AND SMALL ORCHIDS

DENDROBIUM PEGUANUM

Origin: Asia

Temperatures: Warm to hot growing miniature size orchid species

Light: Bright light

Watering & Fertilizing: Regular watering and fertilizing in active growing season, goes completely dormant – no fertilizing from October no watering when leaves are gone with only light mist to keep pseudobulbs from shriveling.

General care: Super cute miniature deciduous Dendrobium species is easy to grow if proper culture is followed. Grows best under hot to warm conditions, in bright shade to bright indirect light, good air movement. Can be grown either potted or mounted. Great for outdoor / indoor growing, windowsills or greenhouses.
