MICRO, MINIATURE AND SMALL ORCHIDS

## DENDROBIUM VEXILLARIUS

**Origin:** Papua New Guinea

**Temperatures:** Cool to intermediate growing small size orchid species

**Light:** Bright light

**Watering & Fertilizing:** Regular watering and fertilizing year-round, good quality water and high humidity.

**General care:** One of the most famous PNG Dendrobiums, these can be found in many different color variations and blooms last for many months. Grows best in bright light, cool to intermediate temperatures, only best quality water (R/O or rain), night temperature drops will initiate buds. This is semi deciduous Dendrobium, old canes will be always leafless and the plant will bloom only on old mature leafless canes - do not remove them, even when they are very shriveled! Regular watering and fertilizing year-round. Great for windowsills, terrariums, vivariums, greenhouses or outside.
