

TARZANEGROUP

MICRO, MINIATURE AND SMALL ORCHIDS

DINEMA / ENCYCLIA POLYBULBON

Origin: Central America & Caribbean

Temperatures: Hot to cool growing miniature size creeping orchid species

Light: Bright light

Watering & fertilizing: Regular watering and fertilizing year-round.

General care: Easy to grow miniature orchid for any beginner, and great add to any collection. Due to creeping growing habit it is best when grown mounted, little moss, letting dry out between waterings. Likes bright light, some direct sun early morning or late evening, hot to cool temperatures and good humidity. These are great for any Florida outside growing, or for windowsill, terrariums and vivariums. Great size blooms appear from fall to spring.
