MICRO, MINIATURE AND SMALL ORCHIDS

DIPLOCAULOBIMUM / DENDROBIUM STELLIFERUM

Origin: Papua New Guinea

Temperatures: Hot to intermediate growing miniature orchid species

Light: Bright shade

Watering & Fertilizing: Regular watering and fertilizing year-round, letting slightly dry between waterings.

General care: Great species for any beginner, and great addition to any Dendrobium collector, this miniature plant from Papua is easy to grow and blooms many times a year. Blooms usually appear from nowhere after the weather change and cover the whole plant, they are short lived, but in compare to other Diplocaulobium these last at least for some 2-5 days. Beautifully shaped and colored. Can be grown potted or mounted, hot to cool, bright shade. Great plants for windowsills, terrariums, greenhouses or outside growing in proper zones.
