

TARZANEGROUP

MICRO, MINIATURE AND SMALL ORCHIDS

HABENARIA MYRIOTRICHA / MEDUSAE

Origin: Asia

Temperatures: Hot to warm growing terrestrial orchid species

Light: Bright shade / bright indirect light

Watering & fertilizing: Regular watering and heavy fertilizing when active growing, will go completely dormant.

General care: Stunning hot growing terrestrial orchid species that is very popular among all terrestrial orchid growers. It is hot / warm growing species, so fits perfect to our hot Florida weather but can grow intermediate too. You must follow deciduous terrestrial orchid care and cycle. These are blooming size large dormant tubers. Keep them in cooler temps and dry when they are dormant (fall/winter) till new growths start to appear in the spring, after you see new growths, you can pot these to your favorite terrestrial mix and pot. It likes bright shade to bright indirect light. Perfect plants for windowsills, greenhouses or outside growing in proper zones year-round.
