

TARZANEGROUP

MICRO, MINIATURE AND SMALL ORCHIDS

LEPANTHES ORTEGAE

Origin: Ecuador

Temperatures: Warm to intermediate growing small size orchid species

Light: Shade

Watering & fertilizing: Regular watering and weak fertilizing year-round, high humidity, using best quality water, only rain or reverse osmosis.

General care: One of the nicest Lepanthes blooms, ortegae is warm growing one too. Spikes are sequential bloomers and re bloom constantly throughout the year. Grows best under intermediate to warm conditions, in shade, with high humidity and good quality water only. It should never be bone dry but also not constantly soaking wet, weak fertilizing year-round. Can be grown potted or mounted. Great for any terrariums / vivariums, frog encounters and glass orbs, greenhouse growing and outside in proper zones.
