MICRO, MINIATURE AND SMALL ORCHIDS

## LEPANTHES TENTACULATA

**Origin:** Ecuador

**Temperatures:** Warm to intermediate growing miniature size orchid species

**Watering & fertilizing:** Regular watering and fertilizing year-round.

**General care:** Very popular due to beautiful marbled leaves, spikes constantly throughout the year. Grows best under warm to cool temperatures, in bright shade, with air movement and high humidity - leaves cannot have water stacked for too long or they will wilt and die, leaves must be dry for night. Can be grown potted or mounted. Great for terrariums, vivariums, frog encounters, glass orbs and windowsills or greenhouse growing. Buds look like little ballerinas dancing on the top of the leaf.
