MICRO, MINIATURE AND SMALL ORCHIDS

## LEPANTHOPSIS ASTROPHORA

**Origin:** Colombia & Venezuela

**Temperatures:** Hot to cool growing miniature size orchid species

**Light:** Bright shade

**Watering & Fertilizing:** Regular watering and fertilizing year-round, good quality water

**General care:** One of our favorite mini miniature orchids and very easy to grow. Grows best under hot to cool temperatures, in shade / bright shade, with good humidity, good quality water. Spikes are sequential bloomers and will rebloom for many months, producing shimmering star shaped like blooms. Excellent candidate for any glass orb, vase or terrarium / vivarium growing, frog encounters, greenhouses and outdoors in proper zones.
