

TARZANEGROUP

MICRO, MINIATURE AND SMALL ORCHIDS

PLATYSTELE REFLEXA

Origin: Ecuador

Temperatures: Cool to intermediate growing small size orchid species.

Light: Bright shade

Watering & Fertilizing: Regular watering and fertilizing year – round, good quality water, high humidity.

General care: Easy to grow miniature orchid, likes good humidity, excellent candidate for any glass orb, vase or terrarium / vivarium growing and frog encounters. Can take bright shade but if you provide too much light, leaves will turn reddish. Spikes are sequential bloomers and will rebloom for many months, producing orange star-like shaped blooms.
