

TARZANEGROUP

MICRO, MINIATURE AND SMALL ORCHIDS

PLEUROTHALLIS / ANDINIA LAPPACEA

Origin: Ecuador

Temperatures: Cold to intermediate growing pendulous miniature orchid species

Light: Bright shade

Watering & Fertilizing: Regular watering and fertilizing year-round, good quality water, high humidity

General care: Pendulous Lepanthes species are very popular among terrarium and vivarium growers. Lappacea produces amazing large orange blooms. Grows best mounted, in bright shade, high humidity and intermediate to cold temperatures. Excellent for terrariums, vivariums, glass orbs or frog encounters, greenhouses or outside growing.
