

TARZANEGROUP

MICRO, MINIATURE AND SMALL ORCHIDS

PLEUROTHALLIS / ACIANTHERA CASAPENSIS

Origin: South America

Temperatures: Hot to cool growing small size orchid species

Light: Bright shade

Watering & fertilizing: One of our favorite Pleurothallis species with beautiful orange blooms and cute leaves. They grow well in warm humid conditions, so Florida outside is excellent. Shade position, keep moist and high humidity. Great for Florida outdoor growing & windowsills, excellent for terrariums, vivariums and frog encounters.
