MICRO, MINIATURE AND SMALL ORCHIDS

PLEUROTHALLIS DRESSLERI

Origin: Panama

Temperatures: Hot to cool growing miniature creeping size orchid species

Light: Bright shade / bright light

Watering & fertilizing: Regular watering and fertilizing year-round

General care: This micro miniature creeping orchid species is very highly sought after not only for stunning large blooms, but for it's cute water melon look-like leaves and interesting growing habit! Once established, it is easy growing orchid that will spread quickly. We grow them in different environments and they all do great, temperatures between hot to intermediate are the best, bright shade or bright light works, best when mounted, blooms constantly throughout the year. Great for any terrariums / vivariums, frog encounters and glass orbs, greenhouse growing and outside in proper zones.
