

TARZANEGROUP

MICRO, MINIATURE AND SMALL ORCHIDS

PLEUROTHALLIS PICTA

Origin: Central & South America

Temperatures: Hot to cool growing small size orchid species

Light: Shade / Bright shade

Watering & Fertilizing: Regular watering and fertilizing year-round, high humidity

General care: Easy growing small orchid, great starter plant for anyone! Likes to be grown in shade, and kept slightly moist at all times, with high humidity. Does great outside in Florida year-round, on windowsills and in terrariums, vivariums and glass orbs, perfect for greenhouses. Can be grown potted or mounted, use sphagnum moss. Produce spikes full of yellow blooms many times a year!
