MICRO, MINIATURE AND SMALL ORCHIDS

## PTEROCERAS SEMITERETIFOLIUM

**Origin:** Vietnam

**Temperatures:** Warm to cool growing small size orchid species

**Light:** Bright light

**Watering & fertilizing:** Regular watering and fertilizing year-round, letting dry out between waterings

**General care:** Great starter plant for any miniature orchid grower. Very easy to grow under warm to cool temperatures, bright light, good air movement, drying between waterings. Best when mounted but can grow potted. Regular watering and fertilizing year-round. Produces beautiful large white blooms. Great plant for windowsills, terrariums, vases, greenhouses and outside in proper zones year-round.
