

TARZANEGROUP

MICRO, MINIATURE AND SMALL ORCHIDS

RESTREPIOPSIS PANDURATA

Origin: Ecuador

Temperatures: Warm to intermediate growing small size orchid species

Light: Bright shade

Watering & fertilizing: Regular watering and fertilizing year-round, high humidity and good quality water.

General care: Beautiful blooms on this not commonly seen small orchid species. Grows best under warm to intermediate conditions, in shade / bright shade, good air movement and high humidity. Good quality water. Can be grown potted or mounted. Great plant for terrariums, vivariums, glass orbs, vases, indoor growing on windowsills or greenhouses and outdoors..
