

TARZANEGROUP

MICRO, MINIATURE AND SMALL ORCHIDS

TAENIOPHYLLUM OBTUSUM

Origin: Malaysia

Temperatures: Hot to intermediate growing miniature leafless orchid species

Light: Bright shade

Watering & Fertilizing: Regular watering and fertilizing spring to fall, slightly less in the winter time, high humidity.

General care: Leafless orchids are fun to grow and always sought-after by all orchid growers. Taeniophyllum orchid species belongs among tiniest and easy to grow ones with beautiful blooms looking like smiley faces with spikes that constantly rebloom for months and blooms lasting a few days. Grows best mounted (not suitable for potting otherwise empty wooden basket would be used), hot to intermediate, bright shade to filtered bright light. They like good watering and fertilizing in active growing season, adding some seaweed will benefit roots, covering with life Spanish moss will help keep higher humidity. Great for greenhouses, terrariums, vivariums, glass orbs, vases, windowsills and outside year-round in proper zones.
