MICRO, MINIATURE AND SMALL ORCHIDS

## TOLUMNIA VELUTINA / ONCIDIUM VELUTINUM

**Origin:** Cuba & Hispanola

**Temperatures:** Hot to warm growing small orchid species

**Light:** Bright shade

**Watering & Fertilizing:** Regular watering and fertilizing year-round, let slightly dry between watering

**General care:** Tolumnia plants are great addition to any small and miniature orchid collection. Easy to grow plants in Oncidium family have attractive growing habit with fan shape like leaves, lot of keikis and spikes with pretty colorful blooms. They are growing in Caribbean so they are hot to warm growing species, like bright shade, and completely drying out between waterings. Best when grown mounted or potted in empty mesh pots. Excellent for windowsills, terrariums or Florida outdoors year-round.
