

TARZANEGROUP

MICRO, MINIATURE AND SMALL ORCHIDS

TRICHOSALPINX SP. ECUADOR

Origin: Ecuador

Temperatures: Cold to intermediate growing miniature size creeping orchid species

Light: Shade

Watering & Fertilizing: Regular watering and fertilizing year-round, high humidity, good quality water.

General care: Very cute mini miniature Trichosalpinx species with interesting pendulous/creeping growing habit. We still don't have ID for this species, it grows more compact and much smaller than Trichosalpinx chamaelepanthes. Grows best under cold to intermediate conditions, in shade, good air movement and high humidity. Only good quality water. Can be grown potted or mounted. Great plant for terrariums, vivariums, glass orbs, vases, indoor growing on windowsills or greenhouses and outdoors in proper zones.
