MICRO, MINIATURE AND SMALL ORCHIDS

TRISETELLA HOEIJERI

Origin: Ecuador

Temperatures: Intermediate to cool growing miniature orchid species

Light: Bright shade

Watering & fertilizing: Regular watering and fertilizing year-round, good quality water, high humidity

General care: This is by far our most favorite Trisetella species for one reason – as many other Trisetella species produce tiny, sometimes microscopical blooms, hoeijeri rewards with amazing huge “bird in fly” like bloom. Fairly easy growing miniature species that grows best under intermediate to cool temperatures with high constant humidity, bright shade and good quality water. Can be grown potted or mounted. Great for glass orbs, vases, terrariums, vivariums and frog encounters, greenhouse growing or outside in proper zones year-round.
