

TARZANEGROUP

MICRO, MINIATURE AND SMALL ORCHIDS

DENDROBIUM / EPIGENEIUM TSANGIANUM

Origin: Asia

Temperatures: Warm to hot growing small size orchid species

Light: Bright light

Watering & Fertilizing: Regular watering and fertilizing spring to fall, less in the wintertime.

General care: Still very rare in cultivations, this is one of the smallest Epigeneium species with beautiful large blooms. Grows best hot to intermediate, in bright shade, good air movement, good humidity. Old pseudobulbs will drop leaves and die off later, which is a natural thing. Can be grown potted or mounted, best mounted due to creeping growing habit. Great plant for terrariums, vivariums, greenhouses and outdoors in proper zones.
