

# How To Customise Our Invitations

**1** Open the link and you'll find on the downloadable pdf with invitation options. They are all designed so you can print 2 per A4 piece of paper.

The link will lead you to Canva, a designing tool, where you'll be able to replace the name, age, date, time and RSVP information with your own.

We have designed these so you only need the free version of Canva.

You just need to create an account and you'll be able to edit your invitations on your browser through the link.

A template created by Meredith Bell was shared with you, start designing now

**2**

These templates include original text too so you have a guide on what to write there! You will see the text that needs to be updated as you hover over them. The templates require between 4-6 changes each, depending on the one you select to use. You will need to update on both sides of the invitation.

**3**

Once you have made the edits required, go to the share button at the top, select DOWNLOAD and then select only the relevant page, all the invite templates will show up to download when you first go into the download. Once downloaded, you can find the file on your computer and print directly or save to a USB and take to your local printer.

**If you have any problems at all please dont hesitate to reach out.**

**We are already looking forward to the party!**
