Skills

Programming & Foundations

- Object-Oriented Programming
- Data Structures & Algorithms (foundational)
- Debugging & Logical Problem Solving
- Version Control with Git

Tools & Technologies

- Git & GitHub
- Visual Studio / VS Code
- Command Line Basics
- HTML & CSS (foundational)

SUMMARY

Computer Science student at Western Governors University with a disciplined, result-oriented approach to learning and problem solving. Building a strong foundation in object-oriented programming, core software fundamentals, and version control, with a focus on writing clear, reliable code. Known for consistency, attention to detail, and performing well in fast-paced environments. Seeking an internship or entry-level role where I can contribute immediately, learn quickly, and continue developing as a software engineer.

EXPERIENCE

Technician

Valvoline Instant Oil Change – Apopka, FL.

06/25 – 12/25

- Performed structured, procedure-driven maintenance tasks while adhering to safety and quality standards.
- Diagnose issues through inspection and communicate findings clearly to

AI Task Contributor (Contract).

Handshake – Remote

12/25 – Present

- Complete structured, specification-driven tasks supporting AI training and evaluation, ensuring accuracy, consistency, and adherence to detailed guidelines.
- Analyze prompts and outputs, apply feedback, and iteratively improve task quality while working independently in a remote environment.

EDUCATION

Associate of Arts in Health Sciences

Tallahassee State College – 12/2020

Bachelor of Science in Computer Science

Western Governors University – Expected September 2028

PROJECTS

Interactive JavaScript Calculator – Developed a web-based calculator using JavaScript to handle arithmetic logic, user input, and dynamic interface updates.

Personal Website with JavaScript Interactivity (Academic Project) – Built a personal website using HTML, CSS, and JavaScript, implementing interactive features through event handling and DOM manipulation to enhance user experience.

C++ Class Roster Management System (Academic Project) – Designed and implemented a console-based application using OOP to manage student records, enforcing data validation, and meet defined specifications
