2020 Partners with a Common Purpose (PwCP) Questionnaire

|-----|---|--------------------|
| 103 | The most memorable experiences during this COVID-19 Pandemic would be having to ask several businesses, wide spread, to close and hearing the fear in the owners voices while doing so, I pray I do not ever have to do that again. Knowing that by doing so, several Mom & Pop establishments that I have regulated for years would not be able to reopen. The other memories that will haunt me will be seeing the fear in elderly men's faces as we tested their wives for COVID-19. The mere stress followed by anxiety to just try to figure out what we need to do next to lower the spread that we have no power over. | 9/10/2020 11:18 AM |
| 104 | Seeing empty downtown streets during the lockdown. | 9/10/2020 11:16 AM |
| 105 | My memorable experience is the difference between using a long belt and swiping every complaint without investigation as compared to a systematic way of addressing issues. e.g. one event sent plans for their big event which EOC reviewed and accepted. Another one did not sent any plans but we reached out to the food vendors and took time in educating them, how it is not a good idea to have an event but encouraged them to submit detailed plans, to include how they will follow through as how and who will monitor and if it is uncontrollable what would they do or how they would confront their customers to wearing face mask social distancing ...all in writing. In the end the second event was successful. However, the first event ended up being a mess and we were called out late into the evening to solve the challenge but by that time it was a little bit too late. Memorable experience is ..knowing what you are dealing with...in this case behavior change for all of us and thus using power and authority and not having effective and efficient plans does not work at all. | 9/10/2020 11:15 AM |
| 106 | I'm still living it. Leading contact tracing efforts, Covid enforcement, and many other activities has been very memorable. | 9/10/2020 11:10 AM |
| 107 | Helping to take care of a dying relative to minimize his exposure. | 9/10/2020 11:05 AM |
| 108 | Restaurant operators were asking me how things were going. | 9/10/2020 11:05 AM |
| 109 | Just asking how managers/owners are doing, letting them know that I am here for them not just as a Inspector but as someone who cares. | 9/10/2020 11:05 AM |
| 110 | Testing negative for COVID-19. | 9/10/2020 11:05 AM |
