

Digital Podium

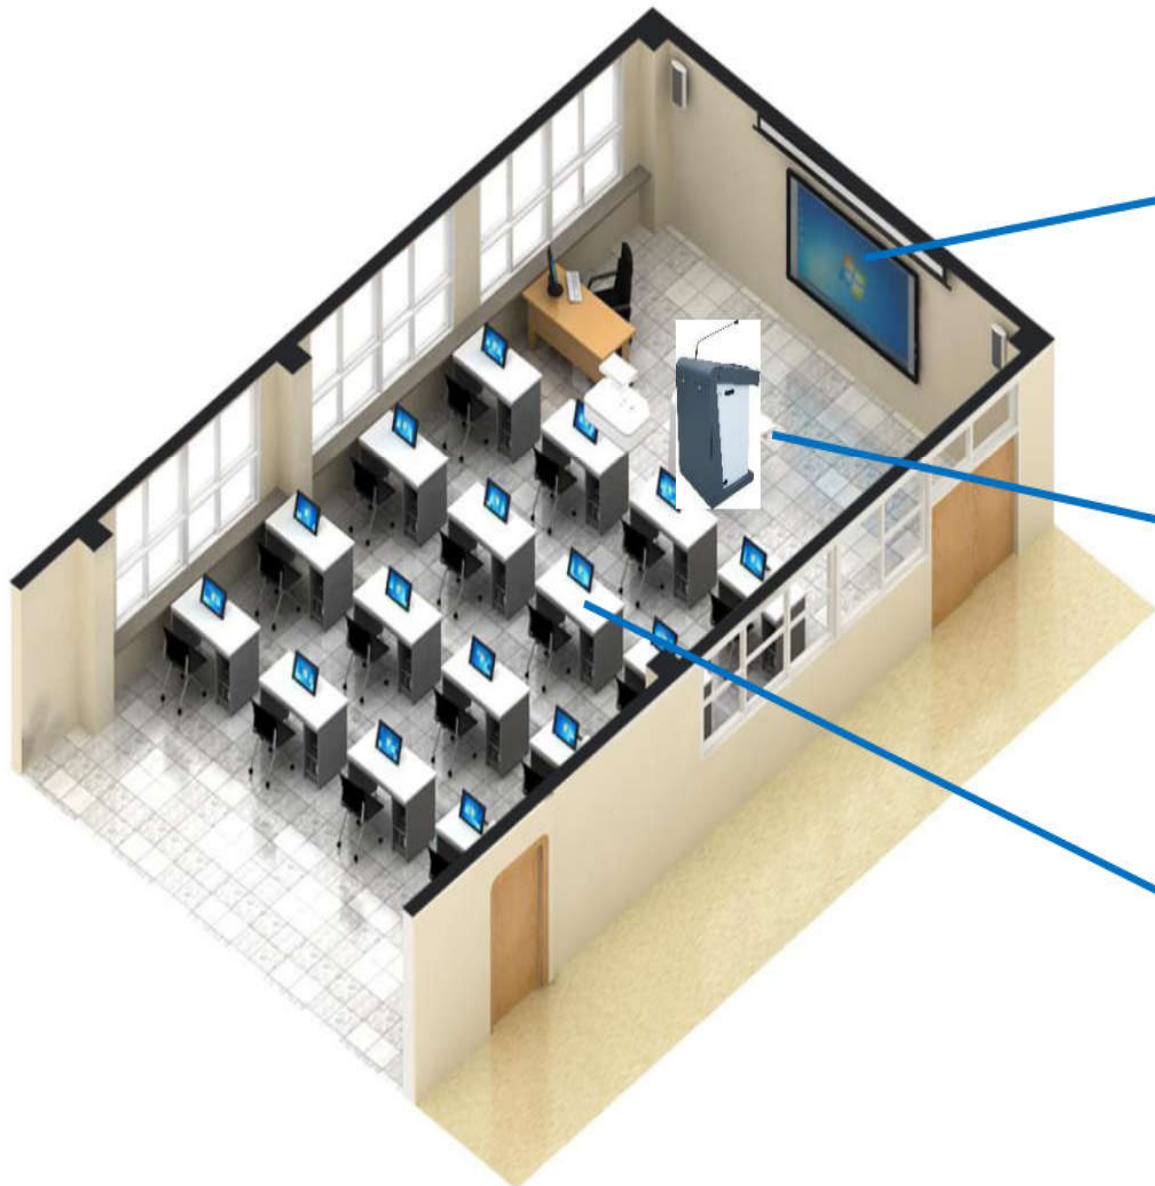

What is a Digital Podium?

Digital Podium acts as a point of control and management for the devices used in the modern smart classroom.

- ✓ Allowing for the storage of components such as desktop, controller, amplifiers, wireless microphone systems and power supplies.
- ✓ Sending the visual signals to the classroom's projector or interactive display, so that all students may view the images and videos.
- ✓ Using an electronic controller so teachers may operate and switch between various devices and sources freely.
- ✓ Interacting with, managing, and writing on digital contents by touch through the podium's interactive 22" tablet monitor.

Digital Podium Installation Example

Interactive Display

Digital Podium

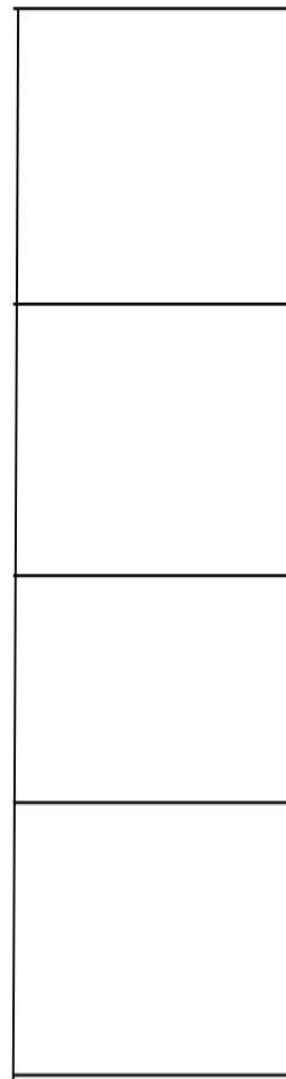

Wireless network environment, two-way solution, Smart pads

Digital Podium Body Housing

Digital Podium Parts Composition

22" Tablet Monitor

HDMI Controller built in
Digital Amplifier + 7" LCD
Controller Touch Pad
