AVIATION & SPACE MUSEUM

Evergreen Aviation & Space Museum is an aviation museum in McMinnville, Oregon. Its exhibits include the Hughes H-4 Hercules, the Spruce Goose, and the Apollo 11 Lunar Module. The museum has more than fifty military and civilian aircraft, unmanned aerial vehicles (drones), and spacecraft. The museum's main buildings include the original aviation exhibit hall, an IMAX theater, a second exhibit hall focused on space exploration, and a hangar for the aircraft.

The museum was founded by Bill and Peggy Smith, a former captain in the United States Air Force and son of Evergreen International Paper Company founder Bill Smith, the Evergreen Museum opened in 1991 with a small collection of vintage aircraft in a hangar at company headquarters.

In March 1990, Disney closed the Long Beach, California, exhibit of the Spruce Goose. In 1992, after a lengthy search, the Evergreen Museum won the bid with a proposal to build a museum around the aircraft (Spruce Goose) and feature it as a central exhibit.
