GRAND CANYON NATIONAL PARK

GCA-PLM-1

ON NATIONAL PARK

Grand Canyon National Park in 1919 by signed order of President Woodrow Wilson. It is believed that the canyon was formed about 5-6,000,000 years ago. Covering a length of 277 miles and ranging from 4,000 to 18,000 feet in depth, the Grand Canyon embraces 1,217,262 acres within the state of Arizona and was designated a National Monument in 1909. The Grand Canyon is one of the most spectacular natural features in the world, and its South Rims, and their contiguous places along the canyon. Prized for its geological story, Nearly 2 billion years of Earth's geological story have been cut through layers of rock while the Colorado Plateau was uplifted.

Some believe the Havasupai People and perhaps other tribes native to this land may be able to genetically trace their origins back to the first people who appeared in North America some 20,000 years ago. The Havasupai continue to inhabit this land.

ESTABLISHED IN 1919

ON NATIONAL PARK

Grand Canyon National Park in 1919 by signed order of President Woodrow Wilson. It is believed that the canyon was formed over a period of 5-6,000,000 years ago. Covering a length of 277 miles and ranging from 4,000 to 6,000 feet in depth, the Grand Canyon embraces 1,217,262 acres within the state of Arizona and was designated a National Monument in 1909. The canyon is a natural wonder and a major tourist attraction. It is a UNESCO World Heritage Site and is one of the most popular national parks in the United States. The canyon is a testament to the power of erosion and the beauty of the natural world. It is a place of wonder and awe, and it is a place that everyone should visit at least once in their lifetime.

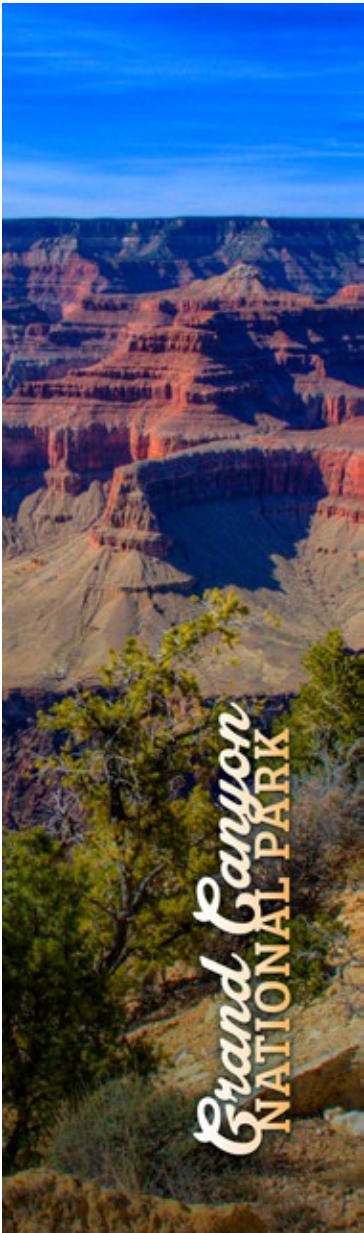

Some believe the Havasupai People and perhaps other tribes native to this land may be able to genetically trace their origins back to the first people who appeared in North America some 20,000 years ago. The Havasupai continue to inhabit this land.
