ABOUT GAN

Graham Advisory Network Incorporated (GAN) provides services that enable public sector organizations to achieve their goals through technology by providing hardware, software, and cloud based products, services, and consulting. Our goal is to always deliver the highest quality, timely and most reliable service possible, while also working to minimize the need for additional maintenance from our government clients. GAN's operations are located in economically disadvantaged areas of the United States and we strive to hire from these areas. As a SDVOSB GAN is also fully dedicated to supporting the needs of, and optimizing the daily life for America's military and veteran families and support communities.

CORE COMPETENCIES

GAN is a technology solutions provider specializing in technology consulting, product acquisition, and project management for the federal, state and local government with an additional focus on the unique needs and regulatory requirements of public sector healthcare, education, and research organizations.
