

Guidelines for South Shore Drive Access Cards and Use

Publication: July 29, 2025

Please review this information and inform others who may access South Shore Drive via the access card or the gate controller phone directory. Updated and revised guidelines will be provided to residents when revisions are made to ensure the latest information is brought to the attention of residents.

Purpose of the Gates

The primary purpose of the gates is to protect the spillway from structural stress that reduces the lifespan and creates undue wear and tear by preventing access to:

- 1. Vehicles weighing 5 tons or more** (vehicles Class 3 or higher)
- 2. Pass-through traffic** (vehicles whose destination is not Silver Lake or Ski Island)

Damage to the spillway can result in a loss of structural integrity that will require access closure to all traffic.

Additionally, the gates reinforce awareness of hazards that arise due to the low water spillway crossing and a reminder to use caution when traversing the spillway.

Resident Access and Responsibilities

Residents and guests may access South Shore Drive at the gate controller.

- **Residents:** Gates automatically open when access card is in vehicle.
- **Guests:** Guests can scroll the directory at the gate controller and call resident. Resident can open the gate by entering *1 on their phone.

Residents issued access cards are personally responsible for their proper use.

- **Personal Use:** Cards are intended for residents' use. Loaning cards is discouraged.
- **Card Custody:** Cards should be secure at all times. Do not leave them unattended or lend them without full knowledge of their use.

- **Guest Access:**
 - Inform guests of the **5-ton weight limit** before opening the gate.
 - Guests unable to comply must use an **alternate route**.
 - Emphasize **spillway safety hazards**.
 - **Avoid long-term use by others.** (instead, request an additional card)
- **Tailgating:** Prohibited for both residents and guests, one vehicle per card.
- **Moving:** Return cards to the **gate representative** upon moving from the community.
- **Lost Cards: Report lost or stolen cards** and request a replacement if needed.

Temporary Open Access

Residents may request that the gates be held open for occasional activities. Residents must **contact their respective gate representative at least three days prior to an event with the date and hours they wish for the gates to be open**. Opening and closing gates is a manual process and is accomplished by a volunteer; please do not leave it to the last minute.

Monitoring and Enforcement

Gate access is monitored via access logs and video surveillance. Logs and recordings are regularly reviewed. If questions of misuse or abuse arise, residents will be contacted by the gate representative. Any misuse or abuse should be reported to the gate representative in a timely manner.

Access card use may be withdrawn if deemed appropriate by Silver Lake, Inc., and SILC.

Inquiries and Reporting

Silver Lake, Inc., and SILC have appointed gate representatives to facilitate the use of the gates and access to South Shore Drive by residents. Access requests, abuse reports, and general questions can be directed to the appointed gate representative who will coordinate with the other gate representative if needed and respond directly to the resident.
