

PVC DRAGLINE HOSE

RECOMMENDATION:

PVC dragline hose is a flexible, durable hose commonly used for agricultural irrigation, water supply, and light industrial applications. Made from high-quality poly vinyl chloride, it offers excellent resistance to abrasion, weather, and UV rays. Its lightweight design ensures easy handling across fields and gardens, making it an ideal choice for efficient water distribution and spraying tasks.

LINER:

Black plasticised poly vinyl chloride (PVC)

REINFORCEMENT:

Polyester Yarn.

COVER:

Weather resistant black plasticised PVC cover.

RECOMMENDED TEMP. RANGE:

-5°C to + 60°C

HOSE ENDS:

Plain

LENGTHS:

30, 50, 100 Metre Lengths

SAFETY FACTOR:

3:1
