MACHINED RESIN LURE MOLDS

- Professional Quality Lures At a Fraction of the Cost of Machined Aluminum Molds.
- Specifically Designed For Low to Moderate Volume Hand Injection.
- Precision Machined From High Density Polymer.
- High Temperature Resistance.
- Resistant to Warpage.
- Can Be Polished To Produce Lures With an Exceptional High Gloss Finish.
- Works With Standard 5/8" Nozzle Injectors and **FusionX** 60 Degree Nozzles.

Multi-Cavity Molds:

Please note on some lure designs (particularly larger sizes) multi-cavity molds are not economically feasible. In these instances the listing for multi-cavity molds is for a discounted price on multiple units of the single cavity mold. These listings are marked with a  symbol. Multi-Cavity versions of these molds may be available by special order. Please contact us for pricing and availability.

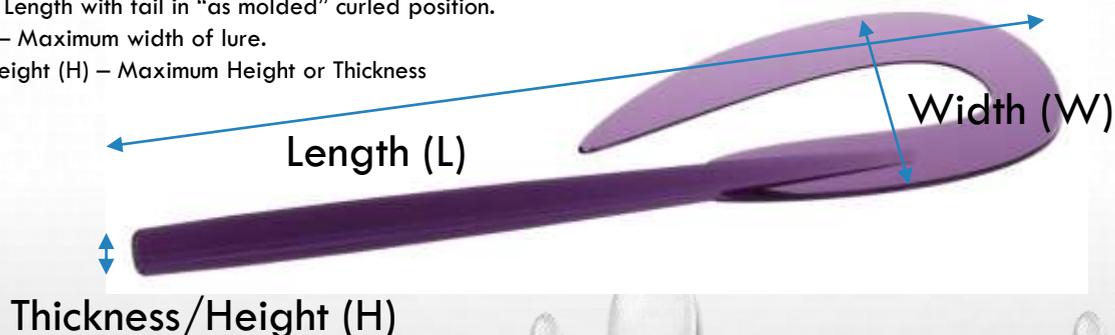

Lure Dimensions:

All dimensions provided are approximate and for reference only. Please review sketch below for how lure dimensions are taken as they will differ from common production lure sizes. More lure and mold photos are available at www.FusionXFishing.com that provide additional size information and comparisons for each lure family.

Length (L) – Length with tail in “as molded” curled position.

Width (W) – Maximum width of lure.

Thickness/Height (H) – Maximum Height or Thickness

INJECTING – Every injection mold and every lure will have its own personality and will require some level of trial and error to get optimal results when molded. Every type and brand of resin will react differently and will require changes to the molding procedure. Experiment with resin temperature, injection pressure, injection speed, mold orientation, and hold time to find the right molding parameters. Softer resins will cause more issues with injection molding as they shrink more during cooling. Keep the resin as cool as possible while getting a good fill to reduce shrink. InjeX molds from FusionX Fishing are designed for low to moderate lure volumes using hand injectors.

Why Choose Machined Resin Injection Molds

Long Life

High Heat Resistance

Great Dimensional Stability

Low Cost

Great Lure Resolution

Mold Alignment Pins:

Each InjeX mold utilizes two steel alignment pins to help align the mold halves. These pins are shipped loose to allow customers to remove for cleaning or to true mold surfaces. Customers may add a drop or two of super glue to one end of each pin then assemble the mold halves and allow the glue to dry overnight if they want the pins to stay in the molds. This must be done very carefully to not glue the mold halves together. Some play is designed into the alignment pins to allow easy assembly and disassembly of the molds. Mold alignment should be adjusted while clamping the halves together by aligning the sprue and riser. We find that allowing some play helps reduce the risk of damaging molds by prying open if the pins are too tight. Replacement pins are available.

Aluminum as an Option

Most InjeX Molds are available in machined aluminum instead of resin. Aluminum molds are special order and will take 1-3 weeks to manufacture based on work load at the time of order. Please email us for a quote. As a general guide the cost of machined aluminum is about 1-1/2 to 2 times that of the machined resin version of that mold listed in this catalog. Aluminum molds will have the same resolution as machined resin molds. The aluminum molds will have better heat transfer properties to allow faster cooling and recasting. Aluminum molds can be polished to a mirror finished if desired. Aluminum molds will be shipped as machined. Polishing services are an extra fee.

Custom Molds & Lure Design

CUSTOM LURE & MOLD DESIGN SERVICES

FusionX Fishing offers custom lure and mold design services for open pour as well as injection molds using silicone, resin, and aluminum. We can do molds for plastisol lures, silicone lures, epoxy lures, and lead lures. We would gladly work with you on an option that fits your budget and timeline. Since each project is unique please contact us for a quotation and what options are right for you. We can work with you on lure design, lure testing, prototype lures, low volume lure production, mold design, mold prototype, limited production molds, mass production molds.

ShakySX

Slim Profile Finesse Worm

ShakySX

The ShakySX is a thin straight profile finesse worm designed for lifelike action when used on a drop shot, shaky head, or Texas rig. It is a highly effective and versatile design for clear water and heavy pressured areas. By far one of the most effective drop shot designs available.

ShakyX

Straight Profile Finesse Worm

ShakyX

The ShakyX is a standard profile straight tail worm designed for a subtle lifelike action when used on a shaky head, drop shot or Texas rig. It is a highly effective lure when a lot of vibration and action is not wanted. The ShakyX has a thicker profile than the Shaky SX.

X-Flip

Paddle Tail Worm

X-Flip

The X-Flip is a standard profile straight worm with a paddle tail designed for a subtle slow tail movement when used on a shaky head, drop shot or Texas rig. It is a good all around worm for use in most conditions and rigging methods. This is one of the most popular worm designs of all time.

RX-Flip

Ribbed Body Paddle Tail Worm

RX-Flip

The RX-Flip is a ribbed profile straight worm with a paddle tail designed for a subtle slow tail movement when used on a shaky head, drop shot or Texas rig. The ribbed body gives the appearance of a larger profile, creates extra vibration, and slows the fall of the lure. The RX-Flip is a great choice when a little extra bulk is needed without the added weight.

WaX Worm

Curved Body Wacky Worm

WaX

The WaX Worm is a curved body "wacky" worm. The curved body gives the worm a pulsating movement when moved through the water on a stop and go retrieve. It is a very popular worm for rigging weightless and on a jig head. Absolutely deadly on a drop shot rig.

DragonX Worm

Serpent Tail Worm

DragonX

The DRAGONX worm is a segmented tail finesse worm. The unique tail design creates increased action when used on a drop shot or shaky head rig. Ribs on the tail help create additional vibration in the water to attract strikes from the wariest of fish.

CurlyX Worm

Curl Tail Worm

CurlyX

The CurlyX is a standard profile worm with a curled swim tail. The curled swim tail creates a swimming action when moved through the water. It is a very popular Texas rigged worm that also works well when used on a shaky head, drop shot or Carolina rig. It is a good all around worm for use in most conditions and applications. This is probably the most popular style worm for warm water use.

Ribbon Tail Worm

RazorX

The RazorX is a standard profile worm with a large ribbon swim tail. The ribbon swim tail creates an aggressive swimming action when moved through the water. It is a very popular Texas rigged worm that also works well when used on a shaky head, drop shot or Carolina rig. It is a good choice when extra action is wanted to trigger aggressive reaction strikes. Also makes a great trailer.

Itchy Twitchy

Paddle Tail Twitch Bait

ITCHY TWITCHY

The ITCHY TWITCHY is a classic paddle tail twitch bait style. It has incredible side to side darting action that fish cannot ignore. This may be the most versatile soft plastic lure around. It catches just about any species of fish that swims in freshwater or saltwater. It can be rigged weightless, drop shot, Texas, Carolina, Shaky head, on a jig head, as a trailer, and on umbrella rigs.

Slim Twitchy

Straight Tail Twitch Bait

SLIM TWITCHY

The SLIM TWITCHY is a classic straight tail twitch bait style. The straight and thin tail gives increased tail action and a faster darting action for a more "lifelike" presentation. It can be rigged weightless, drop shot, Texas, Carolina, Shaky head, on a jig head, as a trailer, and on umbrella rigs. Try the slim twitchy on a double rig with a fast erratic retrieve and drive the Smallmouth Bass crazy.

XW Twitch

Paddle Tail Twitch Bait

(Wide Body & Belly Hook Slot)

XW TWITCH

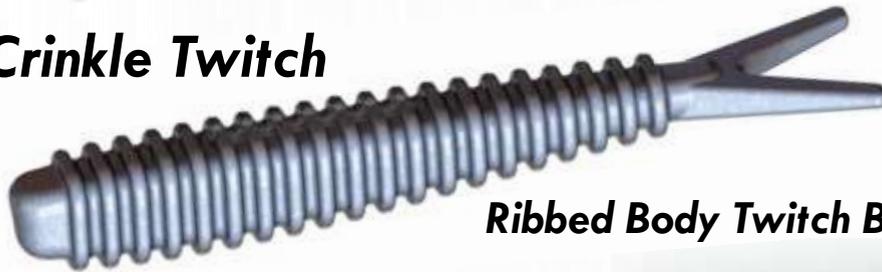

The XW TWITCH is a wide body paddle tail twitch bait. It has a wider body to give the lure more mass for windy days and deeper water fishing. Give the XW Twitch a try for a slower and more subtle twitch bait approach. The belly of the lure has a hook clearance groove that helps improve hooksets and reduces lost fish. The top of the body has a hook slot to protect an exposed hook point.

Rumble Shad Plus

Big Tail Swim Bait

Rumble Shad Plus

The RUMBLE SHAD Plus is a shad bodied swim bait with a thin body and an oversized tail. This lure has a swimming action created by a paddle swim tail. The RUMBLE SHAD body fits between the SX SHAD and SLIM SHAD in size and has a tail that is larger to create more vibration and action. The paddle tail creates tremendous action and vibration that fish cannot resist. The RUMBLE SHAD can be rigged in many methods including weightless, jig head, and as a trailer. The plus model features hook slots on both the belly and back. Hook slot feature is a removable insert that can be used or left out.

SX Sally

Swim Tail Lizard

SX Sally

The SX SALLY is a lizard or salamander imitation lure with a paddle type swimming tail giving it an action similar to many popular swim baits. It is a very popular lure for catching bass during the spawning season as a lizard or salamander is seen as a threat toward the nest of a bass. It works well when rigged Texas style, Carolina, or weightless
