

Innovation through the **FUSION** of Art & Science

EFEX
Soft Plastic Lure Making Pigment

Just add dry blend to liquid plastisol prior to heating

Over **400** Colors Available

For more Information Visit:
www.FUSIONXFISHING.com

DIRECTIONS FOR USE:

1. Gently Knead Package To Breakup Any Clumps
2. Gently Shake Package to Mix Contents
3. Add Package Contents To Liquid Plastisol Resin
Follow Package Instructions
Do Not Leave Contents In Liquid Plastisol For Long Periods of Time. Glitter Colors May Bleed.
4. Stir Pigment Blend Into Plastisol Thoroughly
5. Heat Resin Per Manufacturers Instructions
Stir Frequently During Heating
(If Using Microwave: Stop Heating & Stir At Least 3 Times)
6. Allow Resin To Sit A few Minutes After Heating To Ensure Full Dispersion of Pigment
7. Stir Thoroughly
8. Resin is Now Ready To Use

WARNING!

Molten Plastisol is HOT and will cause SEVERE BURNS if proper safety precautions are not taken. Fusion X Fishing assumes no liability for personal injury or property damage resulting from the use of Fusion X products.

PROPOSITION 65 WARNING: FusionX Fishing products can expose you to chemicals, including airborne silica dust, which are known to the State of California to cause cancer. For more information, go to www.P65Warnings.ca.gov. Take appropriate safety precautions to avoid breathing dust particles.
