

OUR PHILOSOPHY

Healthcare construction doesn't have to be stressful—we believe complex projects should be executed with clarity, confidence, and collaborative partnership. By combining decades of specialized expertise with proactive communication and genuine care for your mission, we ensure your project integrates seamlessly with your operations while delivering exceptional results.

WHAT MAKES US DIFFERENT

Ultra-Rare Technical Expertise

We are among the few contractors nationwide certified for the most complex healthcare construction projects:

Specialized Medical Facilities:

- Cyclotron & particle accelerator construction
- cGMP pharmaceutical clean rooms (ISO Class 5-7)
- Radiation-shielded concrete vaults
- PET imaging production facilities
- Research-grade laboratory facilities

Healthcare Construction:

- Operating rooms & surgical centers
- Advanced imaging suites (MRI, CT, X-ray)
- Emergency department expansions
- ICU & patient room renovations

Critical Infrastructure & MEP:

- Emergency power & backup systems
- Medical gas & vacuum systems
- Building automation systems
- Energy efficiency upgrades

The Johanson Project team successfully completed construction of our Cyclotron facility.

The Cyclotron is a very complex and unique facility and required an extremely competent construction company to build it.

Johanson was able to work within tight time constraints and interacted well with Facilities, Planning/Design & Construction, and other teams within the hospital, seamlessly.

Johanson Construction met and sometimes exceeded our expectations and therefore comes with my sincere endorsement.

WHY CLIENTS CHOOSE JOHANSON

We Self-Perform Critical Work

Unlike typical general contractors, we maintain direct control over quality assurance, project timelines, cost management, and specialized carpentry for both new construction and renovations.

Occupied Facility Specialists

Working around patients and staff requires exceptional expertise. We provide seamless coordination with clinical, facilities, and construction teams while maintaining specialized safety protocols that protect ongoing operations with minimal disruption to critical healthcare services.

Pre-Construction Excellence

- Open book pricing with detailed trade budgets
- Curated network of healthcare-experienced subcontractors
- Value engineering with comprehensive cost/benefit analysis
- Five decades of institutional healthcare knowledge

WOMAN-OWNED LEADERSHIP ADVANTAGE

As a premier woman-owned construction company, we provide proven expertise that helps clients achieve diversity goals, competitive market positioning advantage, and enhanced stakeholder confidence through a fresh perspective on complex healthcare challenges.
