

ADVANCING RESEARCH & LEARNING THROUGH CONSTRUCTION

At Johanson Construction, we create environments where groundbreaking research, innovative teaching, and student success flourish. Our specialized expertise ensures your campus infrastructure supports your academic mission.

SPECIALIZED ACADEMIC FACILITY EXPERTISE

Research Infrastructure:

- Cyclotron & particle accelerator facilities for physics and medical research
- cGMP pharmaceutical clean rooms (ISO Class 5-7) for drug development programs
- Radiation-shielded concrete vaults for nuclear research programs
- PET imaging production facilities for medical and veterinary schools
- Multi-disciplinary research laboratories designed for flexibility and growth

Healthcare & Medical Education:

- Simulation labs and skills centers for nursing and medical programs
- Advancing imaging suites (MRI, CT, X-ray) for teaching hospitals
- Operating room training facilities with observation capabilities
- Clinical spaces that serve both patient care and educational missions

Campus Infrastructure:

- Emergency power systems ensuring uninterrupted research operations
- Building automation systems optimizing energy efficiency campus-wide
- Specialized HVAC for sensitive research environments
- Technology infrastructure supporting modern teaching methods

The Johanson Project team successfully completed construction of our Cyclotron facility.

The Cyclotron is a very complex and unique facility and required an extremely competent construction company to build it.

Johanson was able to work within tight time constraints and interacted well with Facilities, Planning/Design & Construction, and other teams within the hospital, seamlessly.

Johanson Construction met and sometimes exceeded our expectations and therefore comes with my sincere endorsement.

Stanley Boyson
Former Facilities Manager

THE JOHANSON ADVANTAGE

Project Delivery Excellence

- Design-build and Integrated Project Delivery (IPD)
- Early contractor involvement and value engineering
- Phased construction minimizing campus disruption
- Accelerated schedules maintaining student life continuity
- Faculty partnerships integrating coursework with job site experience

Compliance & Standards

- LEED Gold/Platinum certification
- ADA accessibility and energy code compliance
- Hazardous material abatement

WOMAN-OWNED LEADERSHIP ADVANTAGE

As a premier woman-owned construction company, we help clients achieve diversity goals while providing competitive market advantage through proven expertise and fresh perspective on complex academic challenges.
