REFLECTION

SKILLS WE LEARNED DURING THE MODIFICATION:

The skills/information we learned during the modification of the car are that, before we got around to building our car, we spent lots of time coming up with a team name but spending more time brainstorming for the design of our car. We all worked in teams to get creative with our ideas and drawings. This teamwork and designs put together were the inspiration behind our final product! (to be displayed the day of the race)

CAR BODY DESIGN

Designing the car's outer shell was a challenge. We used cardboard to mock up the outer shell of the car in order to come up with the body. After many attempts, we finally got the right dimensions that fit the car. We used our cardboard outlines to cut out the body panels from corrugated plastic sheets used on political signs. Finally, we painted the car red with black racing stripes and added our sponsors' car number, 450, and personal license plate that reads, "SHELBY". The name Shelby was chosen in honor of Carroll Hall Shelby (January 11, 1923 – May 10, 2012), who was an American automotive designer and race car driver. We wanted a name that would have meaning to the race car industry.
