### **Tax Losses**

Loss from one source of income is set off against income from other sources in the same year. Any loss remaining after the set off, is carried forward over the next five years from the end of the tax year in which they incurred.

Current year tax losses may be surrendered by one Cyprus tax resident group company to another. A group company which is tax resident in another EU country may also surrender current year tax losses to a Cyprus tax resident company, provided such company firstly exhausts all possibilities available to utilize its tax losses in its country of residence or in the country of any intermediary EU holding company.

Group relief is available if both companies are members of the same group for the entire year.

Two companies shall be deemed to be members of a group if:

- one is by 75% subsidiary of the other, or
- both are 75% subsidiaries of a third company

The interposition of a non-Cyprus tax resident company does not affect the eligibility for group relief as long as such company is tax resident in either an EU country or in a country with which Cyprus has either a tax treaty or an exchange of information treaty (Bilateral or Multilateral).

Where a company has been incorporated by its parent company during the tax year, this company will be deemed to be a member of this group for group relief purposes for that tax year.

Losses arising from a permanent establishment outside Cyprus can be offset against profits of the company arising in Cyprus. However, any subsequent taxable profits arising from such a permanent establishment are taxable up to the amount of losses previously offset.

A partnership or a sole trader transferring a business into company can carry forward tax losses into the company for future utilization.

## Profits from Intellectual Property:

### Old Intellectual Property regime

Qualifying intangible assets (IP) are those defined in the Patent Rights Law, the Intellectual Property Law and the Trademarks Law.

Under the old IP regime, 80% of the net profit from the exploitation and/or disposal of IP is exempt from taxation.

The net profit is calculated after deducting from the income and/or profit that is generated from the exploitation and/ or disposal of such intangible assets, all direct expenses associated with the production of this income or profit, as well as a 20% annual capital allowance, applicable on the cost of acquisition and/or development of such an intangible asset.

Where a net loss is created, only 20% of such loss is eligible to be surrendered for group relief and/or carried forward.

The above provisions can apply until the 30th of June 2021, to intangible assets that qualified under the old IP regime before 2 January 2016, or to certain IP acquired during the period 2 January 2016 – 30 June 2016.

### **New Intellectual Property regime**

The new regime is effective from 1 July 2016.

Qualifying intangible assets are those developed or exploited or acquired by a person in the course of its business and that relates to IP, are a result of R&D expenditure and for which the person is the economic owner. The Regulations clarify that tradenames, including brands, trademarks, image rights and other IP rights used for the marketing of goods and services do not qualify.

An 80% deemed deduction applies to the profit from the exploitation of such qualifying intangible assets which is calculated based on a specific formula that follows the modified nexus approach.

Capital gains arising from the disposal of a qualifying asset are not included in the qualifying profits and are fully exempt from income tax.

In each year of assessment, the taxpayer may choose to forego the whole or part of the deduction. Where the calculation of qualifying profits results in a loss, only 20% of this loss may be carried forward or group relieved.

The capital cost of any qualifying intangible asset is tax deductible as a capital allowance.

## Special Defense Contribution

### **Defense Tax Rates**

For the calculation of deemed dividend distribution, any losses brought forward group losses as well as any amounts including any additional depreciation from the revaluation of movable and immovable property are ignored.

A Cyprus tax resident individual who is deemed to be receiving dividends from Undertakings for Collective Investments in Transferable Securities (UCITS) is subject to Defense Contribution of 3%.

The amount of deemed dividend distribution is reduced by any actual dividend paid during the period of two years from the end of the year in which the profits relate.

In case where an actual dividend is paid after the deemed dividend distribution date, any deemed distribution reduces the actual dividend on which the defense contribution is withheld.

### **Disposal of assets to shareholder at less than market value**
