

REJUVINATE HAIR NOW

Kit

Now MedClinic is here to assure you that something **CAN** be done about **hair loss**; and we don't mean weaves, wigs and comb-overs. Introducing the **Rejuvenate Hair NOW Kit!** It is perfectly normal for men and women to lose an average of **50-100** hairs per day. However, more severe hair loss is unfortunately just as common. Commit to regrowth and rejuvenation with **GHK-Cu** and **Zinc Thymulin!**

KIT PRODUCTS

GHK-Cu

GHK-Cu is a copper peptide complex which naturally occurs in human plasma which has been shown to increase hair growth and thickness and enlarges follicle size. As we age, the production of GHK-Cu declines, taking our regenerative capacity with it. This compound has been extensively studied, is safe and promotes a healthy system in a wide variety of ways; including strong stimulation of hair growth.
