

David Schmidt is the inventor of LifeWave technology and founder and CEO of LifeWave.

David's experience in business and product development spans over 30 years and includes a formal education in Management Information Systems and Biology at Pace University in Pleasantville, NY. David then went on to pursue several entrepreneurial endeavors and, as a result, owned successful companies involved in manufacturing and product development. One of these companies, Advanced Applications Group, is a research and development center that specialized in energy-production technologies for both military and commercial applications. During his time with AAG, David developed new methods for producing hydrogen and oxygen, designed and prototyped multi-fueled, bladeless-turbine power generation systems, and constructed metal-combustion rocket engines.

As a result of his innovations, David was presented with an honorary doctorate by Dr. Alexander Marinaccio of the International Hall of Fame of Inventors. In addition, as a result of work performed in the design of emergency oxygen systems for General Dynamics and the U.S. Navy, David was invited to participate in the Navy's next generation mini-sub program.

The LifeWave Technology was born out of three years of intense research by David into the concept of being able to naturally increase energy and stamina through elevation of fat burning, utilizing wireless communication to the human body via phototherapy.

Globally, David is the holder of 94 issued patents, with many more being written. More than seventy of those issued patents are in the field of regenerative science and technology. One of his inventions, the Double Helix Conductor, produces a novel blend of electromagnetic and non-electromagnetic fields to improve the speed of wound healing that rivals that of stem-cell injections

David always puts on an amazing conferences, Live Events and more JOIN US..

“Join MILLIONS of us just like you...”

Awards Gallery

Welcome to the LifeWave Award Gallery, which features the recognition we have been honored to receive over the years. Click on the images below for a full view photo of each award.

Problems Facing the World Today and Their Solutions

#AMPLIFY2021

Global Warming Debate

Bjorn Lomborg was named as One of the 100 Top Global Thinkers both in 2010 and in 2011, and as one of the 100 most influential people in the world by Time magazine.

Transform Healthcare

Global Healthcare Facts

Harvard; 20% chance of having an adverse effect to a new drug

Prescribed drugs cause 1.9 million hospitalizations each year

“Another 840,000 hospitalized patients are given drugs that cause serious adverse reactions for a total of 2.74 million serious adverse drug reactions”

Global Pollution Facts

Over 1 million seabirds and 100,000 sea mammals are killed by pollution every year.

People who live in places with high levels of air pollutants have a 20% higher risk of death from lung cancer than people who live in less-polluted areas.

Approximately 40% of the lakes in America are too polluted for fishing, aquatic life, or swimming

FROM CONVENTION 2021

Global Pollution Facts

Each year 1.2 trillion gallons of untreated sewage, stormwater, and industrial waste are dumped into US water

Children make up 10% of the world's population; over 40% of the global burden of disease falls on them.

More than 3 million children under age five die annually from environmental factors
