

Better Balance with bioTE® Nutraceuticals

bioTE® DIM
This powerful, natural component, balances estrogen metabolism.

Found in cruciferous vegetables, can be beneficial for breast, uterine, cervical, and prostate health.

Stimulates more efficient metabolism for estrogen.

Promotes beneficial, healthy estrogen metabolism in both women and men and frees testosterone from binding agents in your blood, which helps balance your hormones and makes you feel great!

Iodine PLUS
Aids in hormone production.

Critical to the production of the thyroid hormone. It is speculated that this deficiency may be one of the causes for the dramatic increase in breast and prostate cancers.

bioTE® Probiotic

Live micro organisms that are either the same as, or similar to those found in the human body.

Considered to be beneficial to digestion and health. Also aids in a variety of gastrointestinal issues such as: diarrhea, and Inflammatory bowel disease.

A-D-K 10

Vitamin A
Required for the normal development, growth and maintenance of the skeleton.

Vitamin D3
Fat-soluble vitamin essential for maintaining normal calcium metabolism.

Vitamin K2
Plays essential role in our health.

Omega-3
An important factor in maintaining healthy bodily functions.

Aids muscle activity, blood clotting, digestion, fertility, and cell division and growth. Omega 3 is beneficial to the heart, eyes, brain, arthritis relief and infant development.

BioTE® Nutraceutical Supplements are the natural complement to bio-identical hormone replacement pellet therapy for optimal balance.

Balancing hormones includes balancing ALL hormones - not just testosterone and estradiol levels. It is important to use a comprehensive approach. This includes maximizing hormone optimization and adequate nutrient and mineral support.

In addition to providing the most medically appropriate forms of bio-identical hormone replacement pellets, BioTE® Medical has developed several unique nutraceutical grade supplements to optimize hormone balance.

All of these supplements are available through your trained BioTE® practitioner.
