#### PLEASE READ AND SIGN:

#### DYNO DISCLOSURE

By signing, the customer agrees that their vehicle is their own property, insured and their own responsibility. The customer accepts all risks associated with dyno tuning and the use of a dynamometer and will not hold 210 Performance or any employees or any off-site business location responsible if their motor blows up, a strap breaks, the dyno breaks, the zombies attack, an alien spacecraft launches an assault and damages the car or if any malfunction occurs with the vehicle while tuning or on the dyno.

Modifying a vehicle for street use is illegal in most states. The customer certifies their vehicle is not driven on public roads where such acts may be illegal or is for competition track use only. Modifying a vehicle beyond factory power levels can result with engine damage. You attest that your vehicle is in safe, working condition with no leaks or other hazards that may render the use of a dynamometer dangerous.

We reserve the right to deny ANY car for ANY reason. Our main concern is safety. If you have stretched tires, WE WILL NOT PUT YOUR CAR ON A DYNO. If the vehicle requires additional services or labor to continue properly with the tune, the customer will be responsible for any additional costs.
