Bolted Stainless Steel Tanks for Potable Water Storage and Waste Water Storage
High Quality, Durable St...
Stainless Steel Water Tanks

Environmentally Safe

Whether dismantling the tank and reusing it elsewhere, or recycling the steel when it has served its purpose, bolted stainless steel tanks have little negative impact on the environment. Bolted stainless steel tanks are recyclable. After years of use, the value of the steel many times outweighs the amount spent on the tank at installation. Additionally, stainless steel tanks do not need painting or coating, which is a process that can harm the environment.

Custom Hardware

American Structures, Inc. uses specially designed stainless steel fin neck carriage bolts in the construction of all of our tanks. The bolts, nuts, and washers are made from stainless steel and have features that allow for greater strength and sealing:
- Larger heads
- Rolled Threads
- Tooling ridges under the head
- Thicker and larger diameter washers

Engineered to Exact Specifications

Each tank is built to specifications and designed with needed appurtenances such as:
- Manholes
- Ladders
- Cone bottoms
- Pumps
- Weirs
- Walkways
- Cages
- Valves
- Nozzles

Tanks can also be painted or coated as needed.
## Common Tank Sizes and Capacity

Standard sizes with roofs or with open tops

All tanks are specially engineered to meet project specs. Many other sizes available.

## Experience and Quality at Work

American Structures, Inc. continuously strives to be the leading provider of bolted stainless steel storage tanks, using 30 years of experience and expertise to help us provide solutions to storage needs. We are one of the few tank companies utilizing stainless steel, which, as a building material, provides benefits such as low maintenance, environmental friendliness, and long lasting use.

We aim to inspire others to work and live a lifestyle that will sustain and improve our environment now and in the future. We are able to provide a great value to our customers by utilizing the advantages of stainless steel.
