

#### APPLICATIONS:

**Residential Areas**

**Hospitals**

**Government Buildings**

**Schools**

**Religious Facilities**

*Or wherever else quiet operations  
are needed*

# Silent Partner™

## Sound Attenuated Enclosure

MWI introduces the newest addition to its lineup – The Silent Partner sound attenuation enclosure. These units are perfect for residential areas, near hospitals, government buildings or schools and wherever else quiet operations are required. The design of the Silent Partner is optimized for pumps that are run hard in difficult environments. Silent Partners are quiet, run cool, provide easy access to all components and are heavy duty.

### FEATURES

- Quiet as a business office - 68 dB @ 7m away - operating at full rated capacity (based on CPB standards).
- Heavy-duty steel enclosure with sound-absorbing insulation, engine vibration isolators and critical grade muffler for quiet, trouble free operation.
- Quick and easy access to all critical components with multiple large access panels via removable doors.
- Doors open to the side to avoid head injuries and the problems of limp struts that won't hold the panels open.
- Lifting bail.
- Available in skid or DOT highway trailer.
- Radiator access port for external topping off.
- Entire enclosure unbolts to provide complete access to the pump, engine and all components.
- External engine oil drain to facilitate oil changes.
- Exhaust in secondary enclosure to reduce temperature and keep the inside clean.
- Lockable doors to prevent vandalism.
- Bolt together modular construction – easily remove or add: lifting bail, tow bar, axle and bumpers to go from skid to portable or vice versa.

The Silent Partner is available for PrimeRite™ and RotoFlo™, and for drive units for DuraFlo™ and Hydraflo™

## TAKE A LOOK INSIDE...

## CONTROL PANEL

MWI offers a wide selection of engine control panels. The engine control panel is protected behind a lockable clear window that provides easy access. The panels are designed for fully automated operation, including fault indicator lights, auto start-stop and telemetry.
