

Coca-Cola Freestyle "Hot Sheet"

For Service on Machine-> **1-800-241-2653 (COKE)**

For Cartridge Issues > **1-800-276-2653 (COKE)**

The Freestyle Daily Checklist

Mix warm water and Kay 5 sanitizer solution and bring to CCFS unit along with nozzle brush and white towel.

Remove nozzle tip by twisting counterclockwise and pulling down. Completely and thoroughly clean nozzle tip and nozzle assembly (where nozzle tip is attached) so that both are free of any visible syrup. Failure to do so will result in clogging or other dispenser malfunctions (false sold outs, incomplete cartridge evacuation, etc.)

Once dry, reinstall the nozzle tip into the nozzle assembly by pushing up, twisting clockwise and pulling down to make sure that nozzle tip is properly attached. Failure to install the nozzle tip correctly will lead to water or syrup leaks or other dispenser malfunction (false sold outs, clogging, flavor or color carryover, etc.)

Pour remaining Kay 5 sanitize solution down drip tray of the CCFS dispenser. Make sure that drain spider is installed to prevent debris from entering drain line.

Clean Nozzle Assembly

-Nozzle Brush – Coke Small Parts #954412

-Nozzle – Coke Small Parts #134983)

Clean Cartridge Slot and Connectors

Keep You CCFS Platform In Spec by Cleaning Your Nozzle Every Day

- Remove the nozzle tip and clean with Kay 5 sanitizer solution.
- Clean nozzle ring (where nozzle tip attaches) and make sure that there is no buildup of syrup.
- Reinstall the nozzle tip by push, turn and tugging on it to make sure it locked into place.

Clean The Cartridge Slot Every Time You Replace An Empty Cartridge

- Remove cartridge, clean the cartridge slot with white towel & Triple Play
- Confirm there are no foil tabs on the connector.
