

BETTA FISH CARE GUIDE

MADE BY @GIRLMEETSPETS

Betta Fish Checklist:

- 5-10 Gallon Tank (10 Gallon Preferred)
- Filter
- Heater
- Substrate (sand/rocks)
- Food
- Tank Décor/Plants (NO SHARP EDGES)

Setting Up Your Betta Fish Tank!

- Step 1: Wash Substrate and add to tank
- Step 2: Add filter and heater
- Step 3: add décor and Plants (silk plants)
- Step 4: Add water and water conditioner
- Step 5: Let tank cycle for at least a week before adding your fish! 2-4 weeks is best!
- Step 6: Add Your Fish

Cleaning!

Siphon your tank every week as well as Weekly water changes.

Betta Fish Diet

Betta Fish are carnivores and need protein in their diet. The best diet for your Betta fish is freeze-dried foods or live foods. These foods include brine shrimp and bloodworms. Though betta fish pellets aren't the best food for your betta there are some pellets that are still great if you aren't comfortable with feeding freeze-dried or live.

Betta fish Pellets:

- Ocean Nutrition Atison's Betta Food
- Hikari Betta Bio-Gold Baby Pellets
- Omega One Betta Food

Clean/well maintained tank + Proper diet = Happy Betta Fish
