

SHOOT UNLEADED

LET YOUR BULLETS HAVE LEAD, NOT YOUR BODY

YOU CAN TASTE THE DIFFERENCE

At some ranges, you can literally taste the lead and the primer — not at On Target Gun Club. Our state-of-the-art air handling system actively filters out the lead.

YOU CAN SMELL THE DIFFERENCE

The HEPA filtration system means that after shooting at On Target Gun Club, your clothes won't smell like gun powder. And with our airlock hand washing station, your hands won't either.

YOU CAN FEEL THE DIFFERENCE

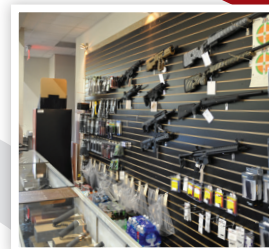

At some gun ranges, the lead in the air literally causes headaches and breathing problems. Our system prevents lead poisoning, for our customers and our employees. We are also climate controlled — during the hottest Georgia summer, it will still be cool in On Target Gun Club.

YOU CAN TOUCH THE DIFFERENCE

Our touchscreen target distance adjustment enables you to pick the correct yardage, without any tricky toggling or guesswork.

YOU CAN SEE THE DIFFERENCE

On Target Gun Club is brighter and lighter. You'll be able to see your targets with proper lighting and baffling. Plus, with the air handling system, the smoke stays clear, even when every lane has multiple shooters.

Been to a handful of ranges, but On Target is clean, well staffed, and everyone there is very friendly and knowledgeable. I became a member and I'm there regularly... a great place for first time shooters or experienced folks. Come check it out! — Chad L., Fayetteville, GA
