

Neighbors in Crisis Need Our Help.

Your Donation Helps Save Lives!

The Pregnancy Support Center of Dodge County serves local women, men, and their babies by being a source of unconditional love and utmost confidentiality. We offer guidance and education in times of physical, emotional and spiritual need. We need your help to serve a growing number of neighbors with dignity.

600+ Clients served in 2024

Strong Families & Strong Community

In 2024, The Pregnancy Support Center served over **600 clients**. Licensed physicians performed 44 ultrasounds for pregnant women; 543 parenting classes were attended; Over 2000 tangible needed items were gifted. Many found assistance with food and housing.

We are embarking on a full renovation of the center. This is a crucial step toward maintaining confidentiality for our clients while serving several families at one time. To achieve these goals and pay off the remaining \$100,000 mortgage, we need to raise **\$700,000**. These funds are critical to our mission. PLEASE HELP!

Due to the growing need for pre and post birth counseling, education and support, the PSCDC is expanding to serve the community better. The **renovation** will also enhance security for our clients, staff and volunteers as well as improving operational efficiency.

Providing Lifesaving Services

We strive to deliver confidential services in a space seemingly growing smaller each day. Due to our life saving work, it is so important to complete our renovation in a timely manner. Your generous contributions will help the Pregnancy Support Center of Dodge County, a **501(C)3 non-profit**, help others!

New Facility will Improve Services

The expansion and renovation will add privacy, in part, by allowing for an advocate reception area in addition to our lobby. The ultrasound room will be relocated to a more private area.

Some other features PSCDC will gain are a third and fourth counseling room, an expanded boutique, and a second bathroom. Upgrades to the center's exterior will bring much needed updating through tuckpointing, painting and siding. The center will be finished off with welcoming aesthetics including awnings, lighting and signage.
