

State Farm® PDR Pricing Matrix for State Farm Paintless Dent Repair Agreement

Notes

- Panels with multiple size dents should be estimated using the size category that represents the majority.
- **Necessary** R&I of items are based on times published in the *Collision Estimating Guides*.
- PDR Corrosion Protection, \$10 per panel, up to a maximum of \$30 per vehicle. Combination repairs may warrant additional labor and materials.
- Damage exceeding a half-dollar size, separately enter \$50 per dent as a dollar amount and include a line remark.
- Available upcharges: (with a **maximum** of **ONE** per panel).
 - Aluminum panels, add 25% to matrix pricing.
 - When requested, add 25% to matrix pricing for panels constructed of High Strength Steel (HSS).
 - Double-layered panels, 25% markup. Panel areas with limited access points such as roof rails can be subject to markup.
 - Roof repairs on full size vans, full size SUVs, extended cab trucks, add 25% to matrix pricing.

MCE = Most Cost Effective, when the dent count exceeds the matrix, PDR can be negotiated with the repair facility on a case by case basis.

Additional Considerations

Panel Markup should be considered on a case-by-case basis.

A panel markup requires a line note explanation.

Extended Panel Repairs add 25%.

Add 25% for Aluminum & HSS panels.

Add 25% for Double Panels (excludes roof rails, and upper door frames).

Maximum 35% markup per panel when 2 or more adds apply.

Damage that exceeds half dollar size, Oversized (OS), add \$50 per dent.

Damage that matches Double Oversize (DOS), add \$100 per dent.

Damage that exceeds half dollar is considered an oversized dent. o Oversized dent charges should be calculated as a separate line item and should not be included in dent count per panel.

If glass replacement is required, please refer to the Glass Coding Process Document to ensure proper coding of the estimate.

Markup and Other Considerations

- 25 percent markup for PDR on aluminum panels. Test panels with a magnet to confirm aluminum.
- Generally, markup is not applicable for exotic vehicles, doors or glue pulls.
- Depending on severity, markup may be applicable for double panels (including roof rails) when entire panel is double panel.
- When combination repair (conventional and PDR) is necessary on a panel that qualifies for markup, apply the markup to the PDR portion only.
- Allow \$45 per oversize dent. An oversize dent is one that is larger than half dollar size.
- A larger SUV, larger truck, or van may warrant a 25 percent markup for roof panels.
- If it makes sense, consider PDR on a panel even if the number of dents is greater than the matrix. Use matrix and enter a manual line entry.

Every claim is different, so handle each claim on its merits. Document claim file when deviation is warranted.

Add-Ons	
Aluminum & HSS Panels	25%
Double Layered Panels (excluding rails)	25%
Extended Panels	25%
Oversized Dent (OS) per dent	\$50
Double Oversize Dent (DOS) per dent	\$100
Corrosion Protection per vehicle	\$10
*MCE = Most Cost Effective	

Notes
Panels with multiple size dents should be estimated using size category that represents the majority
Damage that is off the Matrix, that can still be repaired will be estimated at the discretion of PDR Technician
Extended panels – extended roofs on trucks, SUVs, pickup bedsides, panel vans, long side panels, etc.
Maximum 35% upcharge per panel when two or more add-ons apply
Dent that exceeds half dollar size – Oversize Dent, dent that exceeds two half dollars – Double Oversize Dent (DOS)
Additional charges may apply to damage on body lines, creases and contours
R&I labor values derived from electronic estimating systems
